Why our 4½% is bigger than theirs.

That's the interest rate most banks pay on passbook savings. 4½%. And it's the most the law allows. So how can we pay more?

Here's how. We do it by compounding your interest every day instead of every three months. Or every six months. The way many banks do. Fidelity's difference adds up to an effective yield of 4.6%. Which means more dollars to you at year's end.

Another thing. Your savings at Fidelity earn interest from the day you deposit 'till the day you withdraw. If you're banking somewhere else, chances are all you'll get is a "We're sorry" if you make an early withdrawal.

Stated simply, your passbook savings can't earn more than Fidelity pays.

Because we pay day by day.
